

### Construction wedges

High-quality construction wedges made of strong plastic are suitable for use in various construction works. With the help of wedges, it is convenient to level or bring different structures to one level, including, for example, light walls and floors. Wedges are also used for leveling and installation of doors, windows and parquet to ensure the necessary installation distance.

Construction wedge	Length (mm)	Width (mm)	Thickness (mm)	Package small/big (pcs)
Construction wedge 8/10 (S)	95	29	14	30/500
Construction wedge 9/15 (M)	95	45	15	20/500
Construction wedge 15/25 (L)	150	45	20	16/200
